

While You are in Town

Looking for Xmas Presents

Don't forget that we have many articles
which are useful on the farm

Fuller and Johnson Pump Engines
can be used for a great many different things:
You can pump water, run your cream separator,
washing machine or churn.

We also have the
Lightning Pitless Scales.

With one of these you can weigh your wheat,
corn and live stock before taking it to market
and you will know how much your load is going
to bring you before you leave home, because
these scales are fully guaranteed to weigh cor-
rectly. We have many other articles of great
value on a farm too numerous to mention in this
small ad. Come in and let us show you the Gas
Engine and the Scales before purchasing.

L. B. WILCOX

THE BUSY IMPLEMENT MAN

2012 Lakin

Great Bend, Kan.

To Make Harvesting Easier.

Winfred Jacobs, a young man
who was raised just south of El-
linwood, is coming to the front as
an inventor. A few years ago he
patented what is called the steel
header barge. This is now being
built by a company in Hutch-
inson, of which he is the general
manager.

From a recent issue of the
Hutchinson News we learn that
he is now at work on a new har-
vesting machine. In this proposi-
tion he seems to have a competi-
tor. The article referred to is as
follows:

Two rival inventors of an im-
proved threshing machine which
will revolutionize grain harvesting
and threshing, are now at work

on their projects in Reno county.
They are Winfred Jacobs, of
Hutchinson, and Curtis Baldwin,
of Nickerson. They are working
independently, each one having
his own peculiar invention, but
both are following the same gen-
eral line.

Both have secured patents pro-
tecting their ideas, which are on
different lines, although both ac-
complish the same general results.
This is, in brief, the cutting, har-
vesting and threshing of wheat
all in one operation.

The threshing machine which
Mr. Jacobs is working on is real-
ly a combination of three differ-
ent machines, a header, binder,
and thresher. The combination
machine is so constructed that

the threshing part works with its
own power and gear, so that it
is not a heavy load for teams
to pull.

With the Jacobs machine it is
possible to go into a field of ripe
wheat; and while the simple pro-
cess of cutting the wheat is being
done, it is also threshed at the
same time. The header cuts the
wheat, and it is carried up into
the machine which threshes it as
the apparatus is being pulled
along, delivering the wheat into
bags.

The Baldwin machine is along
a similar idea, but has a feature
by which suction is used, which
is different from the Jacobs ma-
chine. Mr. Baldwin has already
made a test of his machine in a
field of growing wheat and also
in oats, and it worked very suc-
cessfully. He is now organizing
a company to engage in the man-
ufacture of his machine. L. C.
Brown, a Nickerson banker, is
president of the company, and a
number of Nickerson people are
interested and propose to build
the factory in that town.

The Jacobs machine has not
yet been tested out. A model ma-
chine will be built, and be given a
thorough test. Steps are now be-
ing taken by Hutchinson people
to finance the experimental work,
and if it proves successful, build
and if it proves successful, build
a factory and engage in the man-
ufacture.

The company has not yet been
organized, but subscriptions for
stock are being secured to defray
the expenses of experimenting,
the first machine costing some-
thing like \$2,500 to build.

Mr. Jacobs has been engaged in
barges in Hutchinson, operating a
plant at 1,000 First avenue east.
He is vice president and manager
of the Hutchinson Header Barge
Co.

Mrs. V. A. Nixon and Mrs. R.
H. Downing left for Kansas City
Monday morning.

GERMS IN HER SYSTEM.

Every Woman Should Read This
Advice and the Generous
Offer That Goes
with It.

The number of diseases pecu-
liar to women is such that we be-
lieve this space would hardly con-
tain a mere mention of their names,
and it is a fact that most of
these diseases are of a catarrhal
nature. A woman cannot be well
if there is a trace of catarrh in
her system.

Some women think there is no
help for them. We positively de-

clare this to be a mistaken idea.
We are so sure of this that we
offer to supply medicine absolute-
ly free of all cost in every in-
stance where it fails to give sat-
isfaction, or does not substantiate

our claims. With this understand-
ing, no woman should hesitate
to believe our honesty of purpose,
or hesitate to put our claims to
a test.

There is only one way to over-
come catarrh. That is through
the blood. You may use all the
snuffs, douches or like remedies
for years without getting more at
best than a temporary relief. Cat-
arrh in general is a diseased con-
dition of the system that shows
locally most frequently in dis-
charges from mucous membranes.
If local treatment should be as-
sisted by internal treatment for the
general diseased condition if a
complete cure is to be reached.
That internal treatment should be
scientifically devised and faith-
fully administered.

Rehall Muen-Tone is scientific.

ally prepared from the prescrip-
tion of an eminent physician who
for thirty years made catarrh his
specialty. This remedy is admir-
ably adapted to the treatment of
the catarrhal ailments of women.
It purifies and enriches the blood,
tends to stop mucous discharges,
aids in removing impurities from
the system, soothes and al-
so strengthens the mucous tissues,
and brings about a feeling of
health and strength.

We want you to try Rehall Mu-
eu-Tone on our guarantee. If
you are not benefited, or if for
any reason not satisfied, simply
tell us and we will hand back your
money. Rehall Muen-Tone com-
es in two sizes, 50 cents and \$1.
Remember you can obtain Rehall
remedies only at the Hooper Drug
Co.—The Rexall Store.

FOR MEN

Scarf Pins
Tie Clasps
Collar Buttons
